

ALTRON
SECURITY

Streamline Your Digital Signing Workflow

Simplify. Secure. Scale.

Your signed documents, delivered automatically to SharePoint.

Why Document Delivery Service (DDS)?

Smarter document delivery, sorted.

DDS is an add-on to SigningHub that automatically transfers your signed documents straight into SharePoint. Less admin, more compliance, zero fuss.

Automated Transfer

Signed documents move automatically from SigningHub to your SharePoint. No manual steps needed.

- ✓ Reduce manual workload
- ✓ Data sovereignty
- ✓ Ensure compliance

Two Workflow Modes

Listening Service for real-time delivery, plus Historic Clean-Up for migrating older documents.

- ✓ Real-time delivery
- ✓ Seamless integration
- ✓ Historic migration

Security You Can Trust

TLS encryption, no-storage policy, SharePoint access control, and full audit logging.

- ✓ TLS encryption
- ✓ Audit logging
- ✓ Access control

Key Benefits

- ✓ Reduce manual workload — no more chasing signed documents
- ✓ Ensure compliance and data sovereignty with local storage
- ✓ Leverage your existing SharePoint workflows and permissions
- ✓ Enhance document accessibility and traceability across teams

Seamless Integration

DDS connects to SigningHub and SharePoint through secure APIs and modern authentication protocols. No complex infrastructure changes needed — it slots right into your existing setup.

Professional Services & Support

Our team walks with you every step of the way. From project management to change management, we make sure your rollout is smooth and your people are confident. Our PMO keeps everything on track so you can focus on what matters.
